SKILLS

- JavaScript
- Git & Github
- Html/Css
- Bootstrap
- JQuery
- Application Programming Interface (API)
- React(basic)
- MySql (basic)

PROFILE

I discovered my love for programming during a dinner outing with a close friend, who introduced me to the wonders of coding. From the moment I displayed "Hello World!" on my screen and created a simple webpage, I was hooked. Since then, I've completed courses in JavaScript and continually strive to improve my skills through studying and working on projects. My insatiable thirst for knowledge drives me to learn something new every day. Programming is not just a career choice for me, it's a true passion.
